WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US2007/017123

Box No. I Basis of the opinion
With regard to the language, this opinion has been established on the basis of:
a translation of the international application into , which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1 (b)).
2. This opinion has been established taking into account the rectification of an obvious mistake authorized by or notified to this Authority under Rule 91 (Rule 43bis.1(a))
 With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
a. type of material:
☐ a sequence listing
☐ table(s) related to the sequence listing
b. format of material:
☐ on paper
in electronic form
c. time of filing/furnishing:
□ contained in the international application as filed.
☐ filed together with the international application in electronic form.
furnished subsequently to this Authority for the purposes of search.
4. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.
5. Additional comments:

Box No. V Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

see separate sheet

Re Item V

)

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

- Independent claims 1 and 11 are clearly not novel (Article 33(2) PCT) over the disclosure of document US2006/0079768 (D1) for example.
 Said document D1 shows an apparatus and a corresponding method for indicating a current condition of a medical infusion pump (see display 208 in figures 4A and 4B, for example) comprising a memory configured to store two or more colour codes (see paragraphs 66 and 67 in general), a monitor (display 208), a programmable circuit (see paragraph 53) programmed to generate a graphical user interface displaying a colour upon detection of a condition (see paragraph 67).
- 2. Claims 2-10 and 12-21 are at least not inventive (Article 33(3) PCT) when document D1 is considered as closest prior art. In general, the idea of associating a colour to a detected condition of an infusion pump is known at least from document D1. Where on the monitor and under which form to display the colour, and under which condition the colour should be displayed is a clear matter of design for the skilled man in the light of the disclosure of paragraphs 66 and 67 of document D1.

Re Item VII

Certain defects in the international application

Document D1 is not cited in the description (Rule 5.1(a)(ii) PCT). The independent claims are not drafted in the two-part form (Rule 6.3(b) PCT). The claims do not contain any reference signs to the figures (Rule 6.2(b) PCT).
